The only ruler of  
good air

Presenting **LUNAR**  
Ceiling Fan with **BLDC** Motor

## red**dot** design award design concept

GM has been honoured with the prestigious Red Dot Award, 2023. The Red Dot Award represents excellence in design and innovation, values that have always been at the core of our work at GM. Awarded for a path-breaking product that is an epitome of technological innovation and meticulous craftsmanship; the achievement is a testament to the collective efforts of talented teams at GM.

We at GM look forward to continue innovating and crafting more such products that would set newer benchmarks in the design and innovation industry.

# What is BEE

BEE (Bureau of Energy Efficiency) rating agency affiliated to the government of India have revamped its Star Rating system for ceiling fans with reference to IS 374:2019 standard.

Traditional fans typically use a single phase induction motor and are constructed with copper / aluminum, leading to lower energy efficiency. As a result, most conventional fans consume roughly 70-80 watts of electricity and have air delivery rates of 210 to 250 m<sup>3</sup>/min.

The Bureau of Energy Efficiency (BEE) requires manufacturers of fans to have their models tested and certified with star ratings, allowing consumers to easily determine the energy efficiency of a particular fan model.

**The BEE star rating system rates appliances on a 5-point scale based on their energy efficiency. A higher rating indicates that the appliance uses less electricity. The scale ranges from 1 star, being the least efficient to 5 stars, being the most efficient.**

New BEE Star Rating Table based on the fan blade size is divided into two parts:

### For sweep size < 1200

for blade sweep of 900 mm and 1050 mm

Star Rating	Service Value
1-star	≥ 3.1 to < 3.6
2-star	≥ 3.6 to < 4.1
3-star	≥ 4.1 to < 4.6
4-star	≥ 4.6 to < 5.1
5-star	≥ 5.1

### For sweep size ≥ 1200 mm

for blade sweep of 1200 mm, 1400 mm and 1500 mm

Star Rating	Service Value
1-star	≥ 4.0 to < 4.5 for 1200 mm ≥ 4.1 to < 4.5 for 1400 mm ≥ 4.3 to < 4.5 for 1500 mm
2-star	≥ 4.5 to < 5.0
3-star	≥ 5.0 to < 5.5
4-star	≥ 5.5 to < 6.0
5-star	≥ 6.0

## Super Efficient BLDC Fans

Brush Less Direct-Current (BLDC) motor uses a permanent magnet instead of the electromagnets found in traditional induction motors. In recent years, BLDC technology has been developed to reduce energy consumption in fans without significantly decreasing air delivery.

### ADVANTAGES OF BLDC MOTOR FAN

- ★ Lower electricity consumption (65% savings)
- ★ Longer backup on inverters (even on Solar)
- ★ Improved reliability
- ★ Noise reduction
- ★ Longer lifetime

The typical induction-based fan would consume around 75 watts whereas a BLDC fan would consume about 30 watts. A fan is an appliance that runs most of the time if the ambient temperature is high with no regular airflow of cool air. So, assuming they run regularly for 15 hours for 365 days calculation would be:

Fan	Wattage	Hourly Electricity Consumption	Daily Electricity Consumption	Yearly Electricity Consumption	Yearly Costs (6 per unit)
BLDC Fan	30 Watts	0.030 Units	0.45 Units	164.25 Units	985.5
Regular Fan	75 Watts	0.075 Units	1.125 Units	410.625 Units	2463.75

Typical price per unit of electricity in India is assumed to be around ₹6/- for residential users.

**With BLDC fans you can save approximately ₹1,500/- per year.**

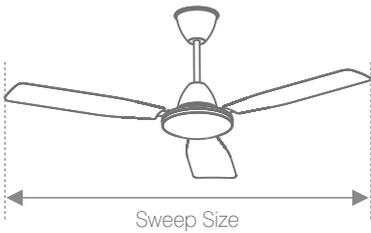

**BLDC fans start with the pricing of around ₹3,000/- while ordinary fans are roughly priced around ₹1,500/-. So, in short, if you run your fans for more than 15 hours daily and per unit electricity cost exceeds ₹6/- you can expect to recover the complete cost of the fan in less than 2 years in the form of energy savings with BLDC fans.**

FUTURE IS  
BLDCC

Visit our website [www.gmm modular.com](http://www.gmm modular.com) or go to any nearest GM Showroom, or a local shop dealing in GM Fans.

- Scroll through our products and their features online, or read through our catalogue.
- Have a proper understanding of your requirement and choose a GM Fan as per your need.
- Choose from the categories namely ceiling, ventilation & exhaust, pedestal, wall, table, personal and industrial fans.
- Our feature categories range from exquisite design, added extra copper, anti-dust fans, high-speed fans, BLDC motor technology, point anywhere RF remote technology, sleek IR remotes, 50% savings on electricity costs, high air delivery, wide voltage range, thermal overload protectors, low noise fans, rustproof body, 360° oscillation to energy efficient motor and much more.
- Note that all GM Fans are functionally modern and externally appealing, and suit all interiors perfectly.
- GM Fans come in various shapes, sizes, colours and designs to match your unique preferences.
- AirMate and Zephyr are our award winning fans, and you can select them without thinking twice!

Sweep- Air delivery is proportional to its sweep. it means the more the sweep, the better the air delivery. But, remember that the area also decides its efficiency.

Speed (RPM)	Air Delivery (CMM)
315	240 ✓

Higher RPM does not mean higher airflow. Airflow / air delivery is the only point of comparison in selecting a ceiling fan.

# Selecting the perfect ceiling fan

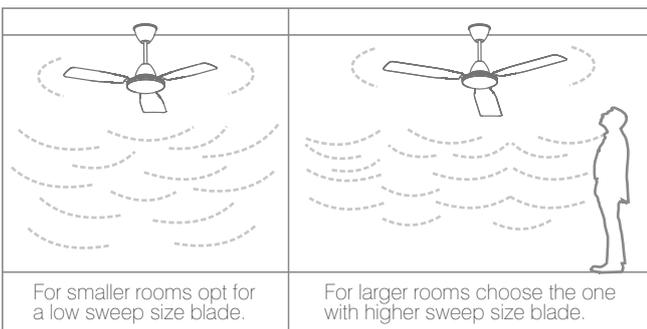

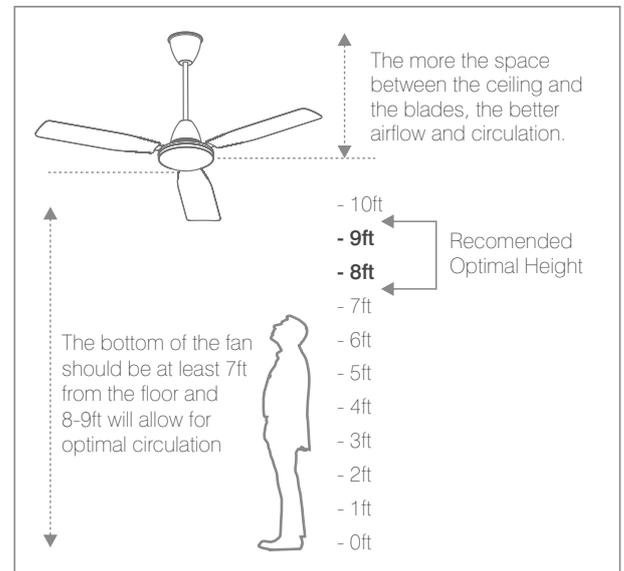

## Energy Efficiency

Lower electricity consumption means higher savings. The more the stars, the better savings

## Optimal Height

Ceiling Height- Use ceiling fans for rooms with tall ceilings, and choose personal or wall fans, for rooms with low height ceilings.

Sweep Size	Room Size
600mm (24")	Small shop, cabin, kitchen, powder room
750mm (30")	06 x 10ft
900mm (36")	07 x 10ft
1050mm (42")	10 x 10ft
1200mm (48")	12 x 13ft
1300mm (52")	13 x 14ft
1400mm (56")	14 x 15ft

# LUXURY IN SIMPLICITY

As a part of GM, I assure you of its quality and dedication to making lives better. The latest range of fans can enhance your life in meaningful ways. GM's products embody the idea of offering both advanced technology and a sense of calm simplicity. In today's world, embracing simplicity is a form of luxury that can bring comfort and elegance to our lives. So, consider GM's innovations not just as electrical accessories, but as a step toward a more refined and luxurious lifestyle.

# Intro duction

Everything began with a dream to make comfort a reality. With passion, diligence, commitment, and honesty we created wonderful things for a better world. We began with switches, moving on to automation, progressively towards LEDs, gradually touching every metaphor of a good smart home. And now we also have an innovative range of fans that will carry the GM logo.

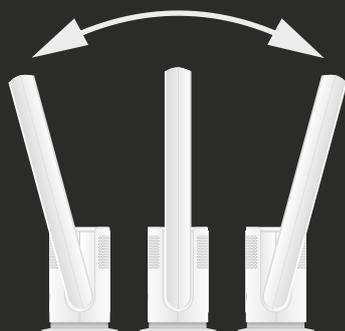

With proper research in design and material, GM Fans have grown with a design aesthetic of clean lines, correct proportions, and a less-is-more philosophy. We use crisp, precise metalwork by artisans with tremendous experience in the industry. Some of the products would pass through rigorous tests at the hands of metal craftsmen and finishers before they are presented, to our customers.

We believe in sustainability based on the simple premise that if something is well made and beautiful it will have a long and useful life and to this end believe that by sourcing local materials and components we are supporting our environment, community, and economy. We continue to follow our aspiration to provide a product that sells across the world because it satisfies a demand for high quality and that will last as a mark of fine innovation and technology.

### HEAVY-DUTY AIR CIRCULATOR FANS

A robust and heavy-duty oscillating type propeller fan comprises aerodynamically designed blades (three), aluminium pressure die cast impeller, sturdy close-mesh guard and energy efficient motor. It also has an epoxy powder coated finish for better durability.

#### FEATURES:

- Aerodynamically designed blades for higher air delivery and lesser noise
- Well-balanced blades
- Pedestal fan with adjustable height
- Up to 360° indexing
- Totally flexible with up to 85° oscillation
- Sturdy powder coated guards with brazed wire
- Robust base for absolute stability
- Low power consumption
- Conforming to IS: 2997-1964
- IEC approved product
- Motor design to efficiently work at lower voltage

#### APPLICATIONS:

- Airports
- Bus depots
- Factories
- Offices
- Theatres
- Pandal decorations
- Heat treatment shops
- Auditoriums
- Conference halls
- Shops
- Restaurants
- Public places
- Railway stations

#### SPECIFICATIONS:

##### Fan Sweep:

450 mm (18"), 600 mm (24")  
750 mm (30") and 900 mm (36")

##### Fan Motor:

4 Pole (standard) 6 pole (optional),  
1 Phase cap start & run or  
3 Phase induction motor

#### POWER SUPPLY:

Standard: 220/240 V, single phase 50 Hz  
380/440 V, three phase 50 Hz

Optional: 110 V/60 Hz, 230 V/60 Hz

#### FINISH:

Standard: Epoxy powder coating in metallic shades

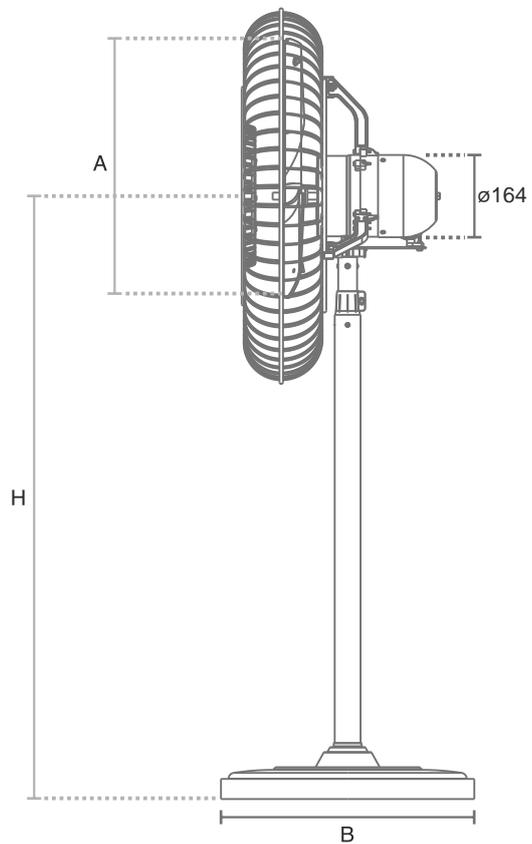

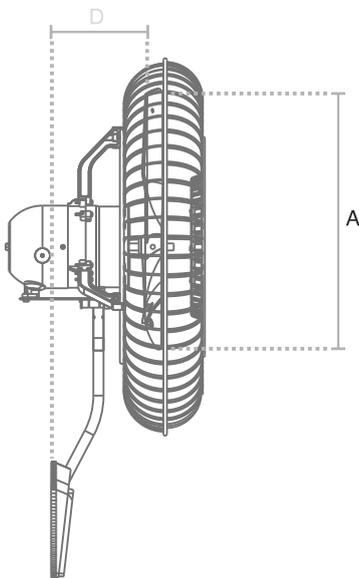

Option: Optional colour available

Bearings: 6202 ZZ (V3C3) ball bearings

## HEAVY-DUTY EXHAUST FANS

Designed to effectively combat pollution, GM Exhaust Fans quietly draw away smoke, odour, dust and dampness, thus allowing fresh air into your space.

### FEATURES:

- Wide range of sweeps to choose from, with suitability for single or three phase AC supply
- Metal frame with rubber mounting for silent operation
- Aluminum extruded section motor & body for higher heat dispersion area to control temperature rise and effective working of motor
- Heavy-duty, totally enclosed, energy-efficient, double ball bearing induction motors
- Precisely balanced aerodynamically contoured metal blades with die cast aluminium spider/hub
- Long-lasting epoxy powder coating
- Availability of accessories like front & back protection guard for safety, and square gravity louvers
- Conforming to IS 2312-1967
- IEC approved product

### APPLICATIONS:

- Factories
- Warehouses
- Hotels
- Theatres and auditoriums
- Paint shops
- Dairies and food processing units

The exhaust fans are also used as a standard equipment in desert coolers, paint booths, welding transformers etc.

### SPECIFICATIONS:

#### Fan Sweep:

300 mm (12"), 380 mm (15")  
450mm (18") and 800 mm (24")

#### Fan Motor:

4, 6 or 8 pole  
1 Phase, cap start & run or  
3 Phase induction motor

### POWER SUPPLY:

Standard: as under  
220/240 V, single phase 50 Hz  
380/440 V, three phase 50 Hz

#### Optional:

220/250 V, Single Phase 60 Hz  
380/440 V, Three Phase 60 Hz  
110 V, Single Phase 50/ 60 Hz

### FINISH:

Standard: Epoxy powder coating military green

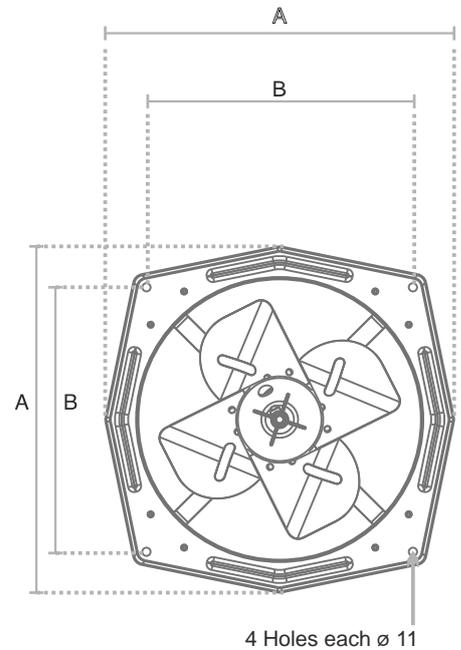

Option: Optional colour, MOQ - 200 nos.

Bearings: Double sealed (ZZ) ball bearings

Made to order: 6 pole 3 phase
