PRODUCT TECHNICAL GUIDE

# Global strength built on local knowledge

Legrand is the global specialist in electrical and digital building infrastructures. Innovation is the driving force behind its development.

With an increasing investment in research and development (circa 5% of sales) and more than 3,700 active patents, the Legrand Group is focused on maintaining a high rate of new product launches that present innovative solutions to the market.

## CORPORATE SOCIAL RESPONSIBILITY

Legrand's CSR roadmap is a natural extension to the governance and sustainable development approach in which the company has been engaged for many years. The CSR roadmap firmly asserts Legrand's ongoing commitment to sustainable development.

# ATLANTIC ENCLOSURES

The weatherproof seal and strength of Atlantic metal enclosures means they are suitable for use on a wide range of sites - commercial and industrial. With excellent resistance to corrosion and chemicals, Atlantic enclosures are the **ideal solution for environments with rigorous hygiene requirements.**

## WEATHERPROOF SEAL

Polyurethane seal for total weatherproofing of the enclosure – IP 66 (or IP 55 for 2-door enclosures).

## REVERSIBLE DOOR

Easy to remove, with metal hinges and pins treated with high-performance anti-corrosion coating to provide strength that is guaranteed to last.

Opens to 130° for easier access into the enclosure.

## SECTIONED UPRIGHTS

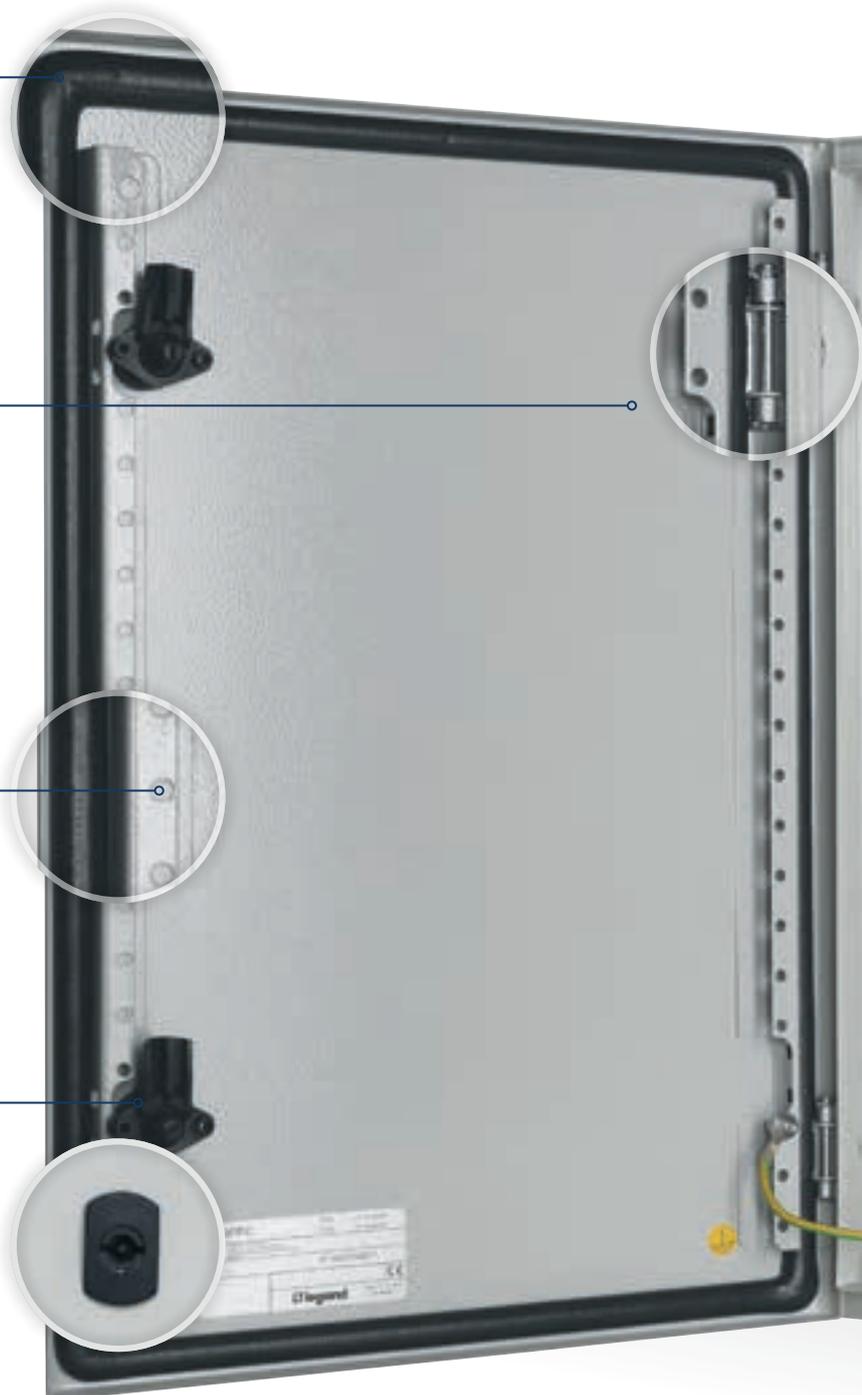

For greater door rigidity.

Makes it easier to mount equipment (Lina rails or perforated ducting) and manage cables.

## DOUBLE BAR LOCK

For more effective closing and to ensure a totally weatherproof seal.

Enclosure supplied with double bar key. Other types of barrel or insert are available as options.

## Save installation time

Supplied ready to use with a removable plain plate<sup>1</sup> and cable entry plate (not fitted).  
1 catalogue number = 1 complete enclosure.

## Scalable and multi-use

Atlantic metal enclosures can be equipped with a wide range of accessories to meet your site requirements, simplify your work and save you time.

### REMOVABLE PLAIN PLATE (SUPPLIED WITH THE ENCLOSURE<sup>2</sup>)

Provides maximum usable space and makes it easier to fix equipment directly.

Can be replaced by ready to use chassis or perforated plates. The enclosure can be equipped with runners to adjust the usable depth.

### REMOVABLE CABLE ENTRY PLATE

With polyurethane seals to make it fully weatherproof. Aligned with the base of the enclosure for a high-quality finish.

Can be equipped with cable glands or replaced by a Cabstop plate to optimise cable entry, which helps save a great deal of installation time and provides good tensile resistance.

## technical characteristics (continued)

### ■ Technical information

Stainless steel enclosures provide a solution in harsh, aggressive environments such as chemical plants or offshore

#### Corrosion resistance

	304 L
To salt spray (SS)	1 000 hrs
To sulphur dioxide (SO <sub>2</sub> )	500 hrs

#### Brushed stainless steel finish

- Polygrain 180
- Ra 0.25 to 0.35 µm
  - Rt 2.5 to 4 µm

#### Stainless steel properties

- 304 L** : Provides good resistance to :
- nitric acid at concentrations of 52 % or less at all temperatures (or 98 % when cold)
  - cold dilute organic acids
  - alkaline solutions (unless hot or above 50 %)
  - saline solutions except chlorides, sulphides and sulphates
  - fresh water and natural atmosphere low in chlorides
  - food products (except mustard and white wine)

# TRANSCAB® ...

uniquely innovative  
open slot trunking

Innovative design and high quality materials combine to create a globally approved system that is quick and easy to install

Using the specially designed tool, support ribs can be easily and cleanly removed

Once the support rib is removed, the base can be snapped to length

By removing individual support ribs, large gaps for T-junctions can be made without the need for a saw

Cable retainers are available for horizontal and inverted installations. Label holders clip onto fingers for easy identification of cables

With its innovative snap to length design, Transcab open slot panel trunking is quick and easy to install without compromising on quality. With its global standards approvals, Transcab is ideal for almost any industrial application.

## Strength and flexibility

Transcab's durable PVC body consists of 6mm gaps and 6.5mm fingers with unique support ribs that provide strength and rigidity. Trunking fingers are easily removed by snapping at support rib or base level without the need for a saw.

### FEATURES

- Snap to length design - for quick and simple installation without the need for a saw
- Rounded fingers - easily removed at support rib or base level to create T-junctions
- Clip-on covers with raised lines - for quick installation and easy label alignment
- Available in PVC and PC/ABS halogen-free versions - to suit a variety of applications
- Sizes : width x height - from 15 x 25mm to 150 x 100mm  
: supplied in 2m lengths

### ACCESSORIES

- Unique cutting tool for removing support ribs - Cat. No. 0367 10
- Cable retainer - for vertical and inverted installations
- Label holder clips to fingers - for easy identification of cables

See p. 46

## Calculating the panel trunking usable cross section

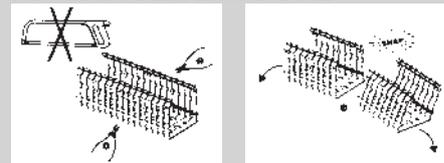

Graph for H 05 V-K and H 07 V-K cables with 0.75 packing coefficient

Example :  
150 conductors 0.75 mm<sup>2</sup> → 1230 mm<sup>2</sup> cross section and  
120 conductors 1.5 mm<sup>2</sup> → 1700 mm<sup>2</sup> cross section  
Makes a total of 2930 mm<sup>2</sup>

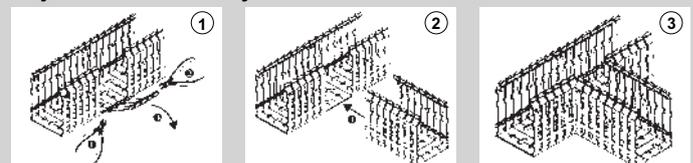

The correct panel trunking is Cat. No. 6361 12, 60 x 60 mm, with a capacity of 3115 mm<sup>2</sup>

## Faster base build without a saw

Remove support ribs at required length and break

## 'T' junctions made easy

- 1 Clip out the required section width support ribs and snap out section
- 2 Form T junction and fix into place
- 3 Ready for wiring - cut cover to suit

fast, secure  
connections  
every time

Available with a choice of screw, spring and heavy duty connection options, Viking 3 terminal blocks provide trusted, safe and reliable installations whatever your application.

Terminal blocks in the screw and spring connection ranges are complemented by a range of common accessories, including end stops, dividers and bridging combs.

Used in conjunction with Legrand's CAB 3 marking system and Starfix ferrules and crimping tools, Viking 3 provides a total solution for easy to use connection systems.

## TECHNICAL DATA

### APPROVALS:

Conform to EN 60947-7-1,  
EN 60947-7-2, EN 60947-7-3,  
UL / CSA / NF / VDE / IMQ  
ATEX certification

### SIZE RANGE:

To fit cable cross sections from  
0.25mm<sup>2</sup> to 300mm<sup>2</sup>

### FLAMMABILITY:

UL94, self extinguishing at 960°C

## SCREW CONNECTION

Universal screw technology, ideal for distribution and process cabinets.

### FEATURES

- Cable capacities from 0.25mm<sup>2</sup> to 95mm<sup>2</sup>
- High quality steel clamp ensures mechanical strength
- Angled cable entries for easy cabling and visible cable marking
- 2 central shunting zones
- Supplied pre-assembled in blocks of 5 or 10, using fixing pin
- 2 marking zones

## SPRING CONNECTION

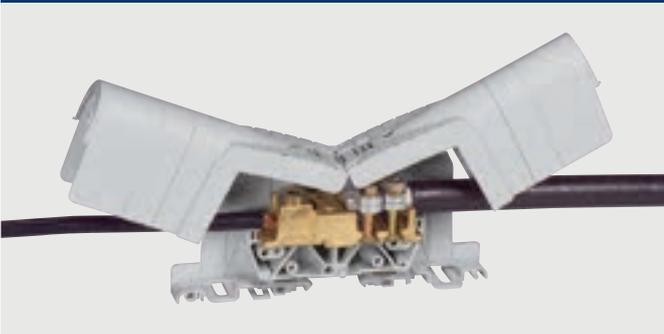

Ideal for vibration sensitive environments such as cranes, machines and onboard cabinets.

### FEATURES

- Cable capacities from 0.5mm<sup>2</sup> to 16mm<sup>2</sup>
- Angled cable entries for easy cabling and visible cable marking
- Direct insertion of rigid cable, or flexible cable with ferrules, in terminal blocks up to 6mm<sup>2</sup>
- 2 central shunting zones
- Reduced cabling time
- Automatic connection with or without ferrules
- 2 marking zones
- No regular retightening required
- 5mm pitch block facilitates 4mm cable

## HEAVY DUTY CONNECTION

Enables copper and aluminium cables with cross sections from 35mm<sup>2</sup> to 300mm<sup>2</sup> to be connected directly or via lugs.

### FEATURES

- Multiple mounting options: DIN rail, G rail or plate fixing
- Compatible with CAB 3 marking system
- Sealable to create weatherproof connections
- Separation barriers and protective covers available
- Provide facility for the termination of larger cables associated with long cable runs

## INTEGRATED ACCESSORIES

Common accessories across the screw and spring connection ranges include:

- End stops with screwless fixing
- Bridging comb with automatic insertion up to 8mm (screw) or 12mm (spring) widths
- Identification of blown fuses (12 / 48 V or 110 / 250 V)
- Additional functions can be added: standard, neutral or protected isolation, MCBs, automotive-type fuses, etc.

## Perfect connections...

Create reliable connections in seconds with Starfix crimping tools and ferrules... everything you need for cable widths from 0.25mm<sup>2</sup> to 50mm<sup>2</sup>.

See p. 78 to 79

## clearly marked

CAB 3 offers a high quality solution to multiple cable and terminal block marking needs. Universal fittings enable clear, rapid marking and simple modification.

# Viking 3 terminal blocks – screw connection

for copper cable

Accessories **p. 58-59**  
 Technical characteristics **p. 60-61**

All V2 polyamide UL94 960 °C to IEC EN 60695-2-11  
 Compatible with either rigid (0.25 mm<sup>2</sup> to 95 mm<sup>2</sup>) or flexible (0.25 mm<sup>2</sup> to 70 mm<sup>2</sup>) copper cables  
 Facility for 2 bridging combs  
 Compatible with rails depth 15 mm and rails EN 60715 depth 7.5 mm and 15 mm  
 Range comprises only 2 block heights (2.5 mm<sup>2</sup> to 10 mm<sup>2</sup> and 16 mm<sup>2</sup> to 70 mm<sup>2</sup>) ensuring a neat installation

# Completing the

Create reliable connections which are clearly marked and secured with Legrand's range of cabling accessories. From Starfix tools and ferrules to CAB 3 marking systems and Colson and Colring cable ties, we've got everything you need to complete your installation to the highest standard.

**Starfix crimping tools - available in 3 sizes for cables from 0.25 to 6mm<sup>2</sup>**

Fit the applicator

Adjust cable size

Insert cable and crimp

**Starfix multi-purpose crimping tool - for cables from 0.5mm to 2.5mm<sup>2</sup>**

Adjust cross section

Cut, strip and twist

Crimp

Create reliable connections in seconds with Starfix crimping tools and ferrules... everything you need for 0.25 to 50mm<sup>2</sup> cables.

# perfect installation

## Colring® cable ties

Colring polyamide 6/6 cable ties feature internal teeth and are available in black UV protected and colourless non UV protected options.

Tool available for tightening and trimming of Colring cable ties

Self-adhesive and screw mounting bases available

## Colson® cable ties

Colson polyamide 12 (halogen-free, low fire hazard) cable ties feature external teeth and offer UV, high level acid and chemical protection.

Tool available for tightening and trimming of Colson cable ties

Screw mounting and wall plug bases available

## Making your mark

CAB 3 offers a high quality solution to multiple cable and terminal marking requirements. Universal fittings enable clear, rapid marking and simple modification.

- Sizes range from 0.15 to 6mm<sup>2</sup>
- Numbers, letters, conventional symbols and international marker colours available
- Supplied in strips - easier to handle / less wastage
- For Viking 3, heavy duty terminal blocks - or fit directly to cables (retrofit possible)
- Mixed marker sets available

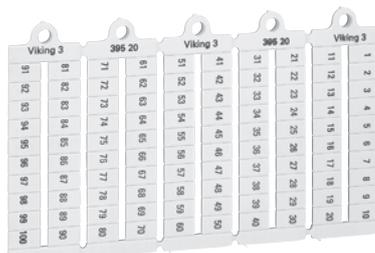

Markers can be fitted directly onto cables or via a marker holder

# Cable tie specification guide

## OPERATING TEMPERATURE

Always check the operating temperature, especially if the cable tie is to be installed in an application where extreme temperature may occur. Not all ties are made with the same material characteristics and some can become brittle at low temperatures and soften at high temperatures

### Legrand recommends

- Colring polyamide 6/6 black cable ties (operating temperature: -15°C to +120°C)
- Colson polyamide 12 black cable ties (operating temperature: -40°C to +100°C)

## ENVIRONMENT

Establish if the cable tie is being used inside or outside. Exposure to sunlight and UV rays can damage and break down the material causing the tie to weaken and fracture. Always choose a UV protected cable tie for external applications

### Legrand recommends

- Colring polyamide 6/6 black or Colson polyamide 12 black UV protected cable ties for external usage

## TENSILE STRENGTH

Consider the load that the cable tie will need to deal with. Tensile strength is the maximum stress that a material can withstand while being stretched or pulled before failing or breaking

### Legrand recommends

- Colson polyamide 12 black UV protected cable ties for heavy load applications

## HALOGENS

Are halogen free cable ties required?

Halogens are a group of highly reactive elements. Products containing halogens can produce highly dangerous gases when burned, and can therefore be life threatening in the event of a fire

### Legrand recommends

- Colring and Colson cable ties, both of which are halogen free

## INTERNAL OR EXTERNAL TEETH

Cable ties with external teeth are particularly useful in applications where internal teeth could cause damage. An example of this is for suspended lines, where damage to insulation needs to be avoided

### Legrand recommends

- Colson polyamide 12 black UV protected cable ties with external teeth

## EXTERNAL AGENTS

Ensure that the cable ties are resistant to any external agents they may be exposed to, such as oils, greases, petroleum products and chlorinated solvents. This is particularly important for extreme environments

### Legrand recommends

- Colring cable ties for environments where oils, greases, petroleum products and chlorinated solvents may be present
- Colson cable ties for environments where oils, greases, petroleum products, saline mist and diluted acids may be present

## FIRE PROPAGATION

Is there a fire risk? This will affect the type of cable tie required. We would always recommend fire resistant cable ties to guarantee the safety of persons and property in the event of a fire

### Legrand recommends

- All Legrand cable ties are flame retardant with a fire resistance to UL 94

**With its unique interlocked load break, the Prisinter is a key asset to the Hypra range and is available in 16, 32 and 63 A ratings.**

## Features:

- Combined socket and switch - saving space, cost and installation time
- Unique interlocked load break system - prohibits on load connection or disconnection for maximum safety
- Padlockable cover - for additional security
- Brass contact sleeves - create high quality, reliable connections
- Stainless steel screws - maximum durability

## Simple, safe and unique

The added safety provided by Hypra's load break system prior to disconnection is equivalent to that provided by safety shutters on domestic sockets.

1. Turn the plug to lock in position and connect power
2. Press the isolator button to disconnect power and remove the plug

## Safe and adaptable power supply for TATA steel Colorcoat® PV Facility

Prisinter sockets and Hypra plugs were specified retrospectively for TATA in a facility which requires machinery to be moved on a regular basis. Machines, originally wired directly to Zucchini tap-offs, are now wired into Hypra plugs, and simply connected and disconnected as required under the safety of Prisinter's interlocked load break switch.

## plugs and sockets

The Hypra range is aimed at installations where maximum durability is a must... including the nuclear, chemical and process industries.

### The highest levels of protection and reliability

Available in IP 44 and IP 66/67-55 rated versions and manufactured in Polyamide 6, Hypra plugs and sockets are ideal for use in harsh and demanding environments.

The plastic units are IK 09 rated, while the class leading metal units are IK 10 rated – the highest rating for impact.

### FEATURES:

- **Integrated cable gland on entire IP 66/67-55 range** - providing the highest levels of ingress protection
- **Captive, slotted connection screws** - for fast secure connections
- **Nickel-plated brass pins and contact sleeves** - creating high quality, reliable connections
- **Captive, stainless steel external screws** - maximise durability
- **Double jaw cable clamps** - provide powerful cable fastening
- **Available in 2 ranges** - IP 44 and IP 66/67-55

## Example of 63 A 3 P + ⊕ and 3 P + N + ⊕ pilot pin connection

The pilot pin enables the load to be removed prior to the separation of the phase pins, when the circuit is routed via a contactor

The pilot pin connection accepts 2.5-6 mm<sup>2</sup> flexible or up to 10 mm<sup>2</sup> rigid conductor. It is the small centre pin in the connection

## ■ Example of 63/125 A 3 P + ⊕ and 3 P + N + ⊕ pilot pin connection

The pilot pin enables the load to be removed prior to the separation of the phase pins, when the circuit is routed via a contactor

The pilot pin connection accepts 2.5-6 mm<sup>2</sup> flexible or up to 10 mm<sup>2</sup> rigid conductor. It is the small centre pin in the connection

Plugs and mobile sockets	2.5 to 6	Flexible
Surface and panel mounting sockets	2.5 to 10	Rigid

# P17 TEMPRA PRO

## RELIABLY VERSATILE....

The P17 Tempra Pro range offers a choice of plugs, sockets and combination units each designed to meet the individual needs of specific areas of the market.

Available in LV 16 A, 32 A, 63 A and 125 A versions, the range offers IP 44 and IP 66/67 ingress protection (IP 44 and IP 66 for combination units) to meet the needs of both internal and external projects.

## SAFE AND SOUND

Manufactured from polyamide 6 which boasts high chemical resistance and IK 09 impact rating, P17 Tempra Pro is no amateur. With its impressive temperature resistance qualities and choice of IP 44 and IP 66/67/69<sup>1</sup> protection options, the range is suited to most internal and external applications.

# P17 TEMPRA PRO

The new P17 Tempra Pro range has been subject to extensive research to ensure its new ergonomic design not only looks the part but makes life easier for the user. Reliable cable connections are easily created in an optimised wiring space which is protected by a robust exterior that performs well in a wide variety of environments.

## Surface mounting sockets

### EASY FIXING

Stainless steel captive screws with mixed head (for cross or flat screwdriver), provide a good seal, anti-corrosion resistance and save time during installation

### CABLE ENTRY

Back boxes have 4 threaded, sealed cable entries on the top and bottom edge and marking on the back for ISO cable glands or conduit

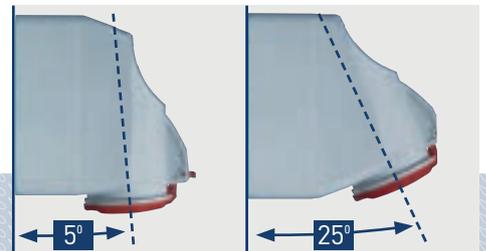

### ONE SCREW

A single captive PZ 2 screw, per terminal for simple and easy connections

### EASY REMOVAL

Remove active parts from the base for easier wiring and to change the angle of the socket

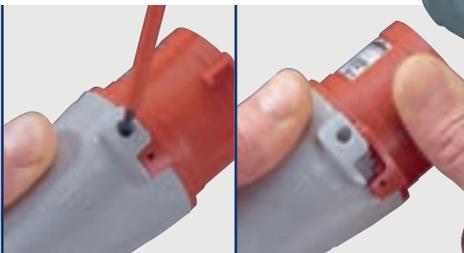

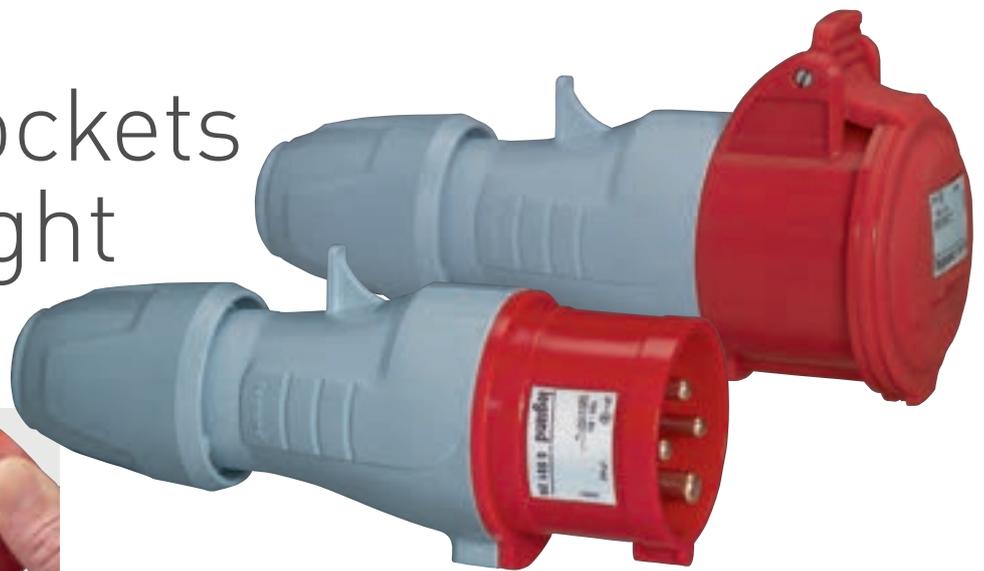

### TWO MOUNTING POSITIONS

To solve the problem of limited space, surface mounting sockets offer 2 different mounting positions (5° or 25°) which allow users to adapt to the space available without changing the box

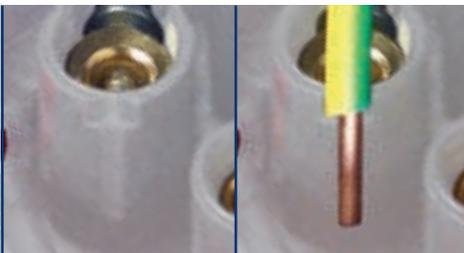

# Mobile sockets and straight plugs

## QUICK OPENING / CLOSING SYSTEM

Unlock by pressing with a screwdriver. Marking indicates the location for the locking clip. Open by turning the two parts in opposite directions

## CABLE STRIPPING

Marking allows the user to see quickly the length of cable to be stripped. Option of using cables with ferrules

Innovative design and quality construction make P17 Tempra Pro ideal for a wide variety of applications

All plugs and sockets in the IP 44 and IP 66/67/69 P17 Tempra Pro range, as well as combined units, are tested and comply with IEC 60309 1 & 2 standards. These relate to the flammability test method called the incandescent wire test which is used to check that the exposure of electrical equipment insulation to intense heat will not cause uncontrolled ignition, and that the material extinguishes itself once removed from the heat source.

Self-extinguishing:

850 °C (support of active parts) /

650 °C (plastic housing)

The P17 range is tested at Legrand laboratories using the following standards relating to self-extinguishable products:

• IEC 60695-2-10: standard covering test equipment

• IEC 60695-2-11: standard covering products

• IEC 60695-2-12: standard covering material specimens

Temp. rating: - 25 °C to + 40 °C according to BS EN 60309-1,

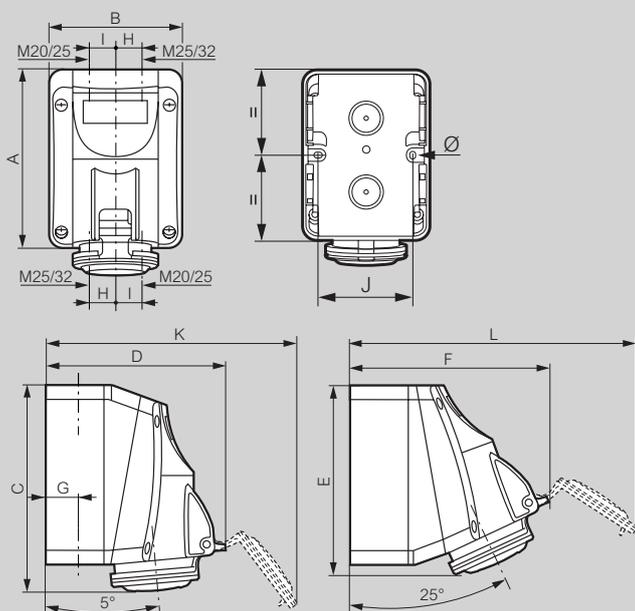

BS EN 60309-2, IEC 60309-1 and IEC 60309-2

Conform to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and

Material: polyamide 6

All plugs and sockets in the IP 44 and IP 66/67/69 P17 Tempra Pro range, as well as combined units, are tested and comply with IEC 60309 1 & 2 standards. These relate to the flammability test method called the incandescent wire test which is used to check that the exposure of electrical equipment insulation to intense heat will not cause uncontrolled ignition, and that the material extinguishes itself once removed from the heat source.

Self-extinguishing:

- 850 °C (support of active parts) /
- 650 °C (plastic housing)

The P17 range is tested at Legrand laboratories using the following standards relating to self-extinguishable products:

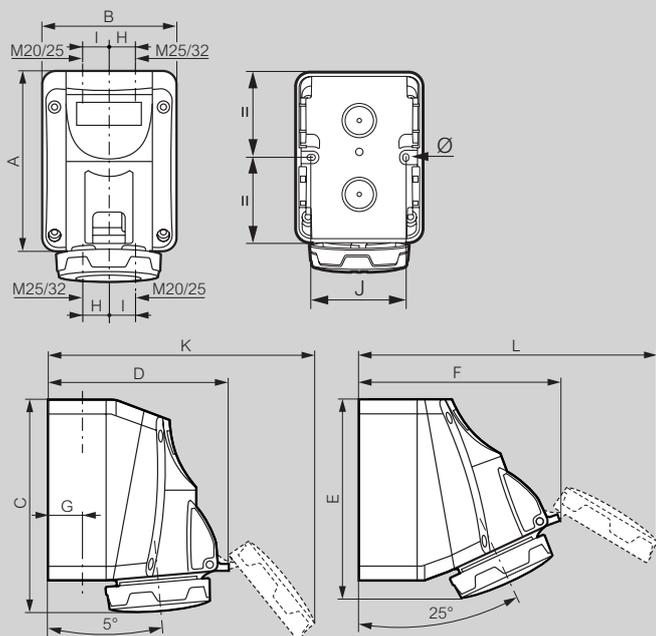

- IEC 60695-2-10: standard covering test equipment
- IEC 60695-2-11: standard covering products
- IEC 60695-2-12: standard covering material specimens

Temp. rating: - 25 °C to + 40 °C according to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and IEC 60309-2

### Hypra<sup>®</sup>

Tough and durable combination units available with Hypra Prisinter or panel mounting sockets.

- Lockable transparent window - for security and instant monitoring of protection device status
- Captive, stainless steel external screws - for added durability
- Off load connection and disconnection on Prisinter equipped versions - providing additional safety for users and circuits alike
- Choice of circuit protection - DIN rail mounted MCB, RCBO and RCD protection options

Lockable transparent window for security and instant monitoring of protection device status

Prisinter sockets offer a unique interlocked load break

## P17 Tempra®

These combination units feature a unique plug-in design that enables the base to be wired independently of the cover, making installation both quicker and easier:

1. Fix the base on to the wall
2. Wire the protection device and the base socket connection independently of the cover
3. Close the combination unit and plug in

Double mechanical interlocking switch cannot be turned on unless a plug is inserted. Once switched on, the plug cannot then be removed until the switch is turned off

Units can be fitted with a variety of Legrand modular devices, including MCBs, RCDs, timers, contactors and indicators. Lid window allows instant monitoring of protection device status

plastic surface mounting

## Technical information

IP 67 conforms to BS EN 60529 and IEC 60529  
 IK 09 conforms to BS EN 62262 and IEC 62262  
 External screws in stainless steel  
 Icc 10 kA conforms to BS EN 60309-1, BS EN 60309-2 and IEC 60309-1, IEC 60309-2  
 Self-extinguishing : 850 °C for insulated parts (650 °C for housing) according to BS EN 60695-1, BS EN 60695-2, IEC 60695-1 and IEC 60695-2

## Connection and protection

### Connecting socket bases

Cross section of cables inside the unit according to the current used :  
 Socket 16 A : 2.5 mm<sup>2</sup>  
 Socket 32 A : 6 mm<sup>2</sup>  
 Socket 63 A : 16 mm<sup>2</sup>

### Types of protection and number of modules

Upstream, Hypra equipped or to-be-equipped units can integrate, according to catalogue numbers, modular protective devices of various kinds :  
 Legrand MCBs, RCBOs and RCDs

**NB** : according to the required use, it is essential to check that the protection against indirect contacts (residual current) and the protection against overloads and short circuits (Legrand circuit breakers) are both well covered

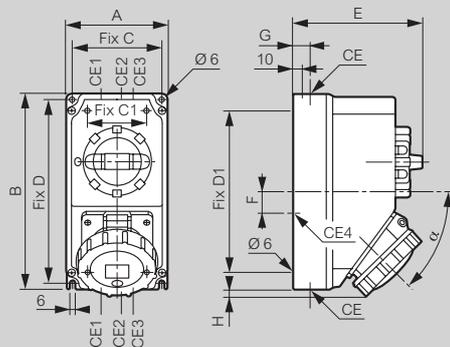

**Caution** : a residual current device (RCD) does not provide protection against overloads and short circuits

**Short circuit withstand** : for the short circuit withstand of MCBs, RCBOs and RCDs, refer to the performance pages for these products in the relevant section of this catalogue

### Ratings for units equipped with residual current device (RCD) :

Ratings		Sensitivity
16 A	RCD 25 A	30 mA
32 A	RCD 40 A	30 mA
63 A	RCD 63 A	30 mA

## Technical information

Material: polyamide 6

All plugs and sockets in the IP 44 and IP 66/67/69 P17 Tempra Pro range, as well as combined units, are tested and comply with IEC 60309 1 & 2 standards. These relate to the flammability test method called the incandescent wire test which is used to check that the exposure of electrical equipment insulation to intense heat will not cause uncontrolled ignition, and that the material extinguishes itself once removed from the heat source.

Self-extinguishing:

850 °C (support of active parts) /  
650 °C (plastic housing)

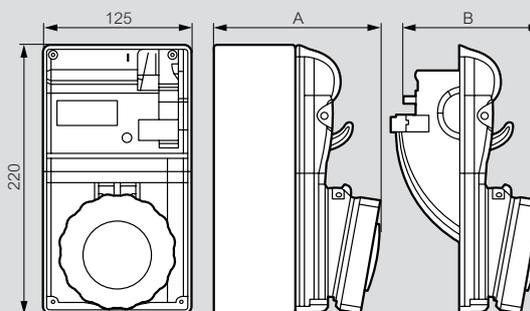

The P17 range is tested at Legrand laboratories using the following standards relating to self-extinguishable products:

- IEC 60695-2-10: standard covering test equipment
- IEC 60695-2-11: standard covering products
- IEC 60695-2-12: standard covering material specimens

Temp. rating: - 25 °C to + 40 °C according to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and IEC 60309-2

# industrial plugs and sockets to International Standards

Conform to BS EN 60309-1, BS EN 60309-2, IEC 60309-1 and IEC 60309-2

## Voltage identification

Colours specified by standards and the clock indexing of the contact tubes in socket outlets

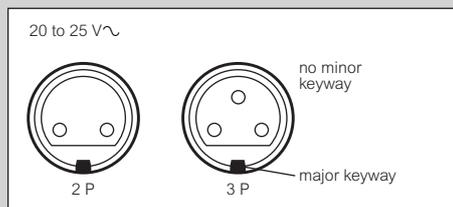

## With Legrand Hypra and P 17 Tempra industrial plugs and sockets, your installations will comply fully with international standards :

- Standard IEC 60309-1 : this defines the safety regulations (protection of workers) which should be observed in the manufacture of industrial power sockets and plugs
- Standard IEC 60309-2 : this defines the interchangeability regulations for the dimensions of equipment with pins and sockets

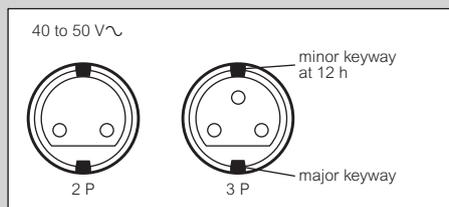

These safety regulations, together with the requirements of standard BS EN 60309-1, define the safety conditions necessary for normal operation. It is prudent to go one step further and insist on equipment which ensures the safety of the persons as a priority as well as ease of operation. Many manufacturers therefore use sockets which incorporate a switch, to avoid on-load disconnection (eg : Hypra Prisinter).

# Protection classifications

## Protection against solid bodies and liquids : Index of protection - IP xx

Degree of protection of enclosures of electrical equipment in accordance with standards IEC 60529, BS EN 60529  
Up to 1 000 V~ and 1 500 V\_

1 <sup>st</sup> digit: protection against solid bodies		Additional letter IP XX (ABCD): protection against direct contact resulting from the access to hazardous current-carrying parts		2 <sup>nd</sup> digit: protection against liquids			
IP	tests	IP	tests	protection	IP	tests	
0	No protection				0		No protection
1	Protected against solid bodies larger than 50 mm	A	The back of the hand remains remote from dangerous parts		1		Protected against vertically-falling drops of water (condensation)
2	Protected against solid bodies larger than 12.5 mm	B	The dangerous parts can not be touched when introducing a finger		2		Protected against drops of water falling at up to 15° from the vertical
3	Protected against solid bodies larger than 2.5 mm	C	The dangerous parts can not be touched when introducing a tool (eg a screwdriver)		3		Protected against drops of rain water at up to 60° from the vertical
4	Protected against solid bodies larger than 1 mm				4		Protected against projections of water from all directions
5	Protected against dust (no harmful deposit)				5		Protected against jets of water from all directions
6	Completely protected against dust	D	The dangerous parts cannot be touched when introducing a wire		6		Protected against jets of water of similar force to heavy seas
					7		Protected against the effects of immersion
					8		Protected against prolonged effects of immersion under pressure
					9		Protected against high pressure and temperature water jets
					9K <sup>1</sup>		

Legrand appliances for domestic applications, once installed, have a degree of protection IP equal to or greater than IP 2XC  
1 : In accordance to ISO 20653

A product previously classed as IP xx-7 can be assumed to fulfill the conditions of an IP xx - IK 08

This table can be used to ascertain the resistance of a product to an impact given in Joules from the IK code (graduated from 00 to 10). It can also be used to ascertain the correspondence with the old IP code 3rd digit and the corresponding external "Ag" conditions.

The contents of the Protection Classifications charts are for guidance only. If you have any doubt as to the interpretation of the information contained therein, please refer either to the standard itself or contact Legrand.

## Health and Safety at Work, etc. Act. 1974

### Statement to Purchasers and Prospective Purchasers

1. Section 6 of this Act provides that manufacturers, designers, importers or suppliers of articles for use at work have a duty to ensure so far as is reasonably practical, that the article will be safe and without risk to health when properly used. An article is not regarded as being 'properly used' if it is used without regard to any relevant information or advice relating to its use made available by the manufacturer, designer, importer or supplier.

2. With regard to these provisions the following is given as a guide to the information which is readily available to you. This information relates to those products detailed in our catalogue(s) or associated literature or may be obtained by specific request to the Company.

3. All products should be installed and maintained in accordance with good engineering practice and relevant British or

other applicable standards, regulations for the installation of equipment by the Institute of Electrical Engineers or any other applicable Codes of Practice.

### Health and Safety at Work Act

#### The Electricity at Work Regulations, 1989

1. All installations and maintenance should be carried out within the provision of the above Act and by persons so qualified as defined in the Act.

2. Information and advice on the suitability of our products can be obtained from Legrand Electric Limited on specific request.
